

# ZERO OPTION COMPOSITE BUSHING

SEE OTHER PDF FOR SIZING

All bushings made in the USA and laser engraved for easy identification and reorder. Custom laser engraving for your part numbers also available.

Zero Option bushings are **NOT** afraid of grease **AND CAN BE RUN** with any good synthetic lubricant for even better performance unlike graphite bushings.

Because of their ability to ingest debris and keep contamination from falling into your molding area the Zero Option bushing along with your leader pins will need to be cleaned from time to time in order to maintain peak performance.

Standard lengths from 7/8 thru 5-7/8. Custom lengths to your drawings. Toe clamp style die bushings also available to industry standards.

\* Metric mold and toe clamp style also available.

## ABOUT

We would like to invite you to try a solution to your product contamination and mold maintenance problems. The Zero Option bushing requires **NO LUBRICATION**, Uses no graphite and requires No rework.

Made from **HARDENED 4140** material with a high performance composite this bushing is designed for a long **TROUBLE FREE**, grease free life. Sit back and relax let us take the hassle out of your molding operation.

The common law of business balance prohibits paying a little and getting a lot... it can't be done. If you deal with the lowest bidder, it's well to add something for the risk you run. And if you do that, you will have enough to pay for something better.

**STOP SPENDING GOOD MONEY ON BAD BUSHINGS.**
